

## International Association of Craniofacial Identification (IACI)

### One-day Symposium – 23 July 2021

The IACI conference in Liverpool has been postponed to July 2022 due to the continued pandemic. However, we will be hosting a one-day online symposium as an IACI taster event on 23 July 2021.

The theme of the event will be:

#### ***‘Race and Face: bias in forensic and archaeological investigation’***

Keynote speakers will be:

- Race and Forensic Investigation - Prof Amade M’Charek, University of Amsterdam
- Race and Facial Recognition Algorithms - Dr Jonathon Phillips, National Institute of Standards and Technology's Information Technology Laboratory
- Race and Super-recognisers - Dr Josh Davis, University of Greenwich
- Race and Forensic Genetics - Dr David Skinner, Anglia Ruskin University

There will be an online poster event and the opportunity for some short presentations on any of the following topics:

#### Facial identification of the dead

- Facial reconstruction/approximation
- Craniofacial anatomy
- Craniofacial superimposition
- Depiction of preserved remains for museum exhibition
- Ethical issues relating to the presentation of faces of the dead
- DNA analysis for facial depiction of skeletal remains
- Migrant disaster victim identification
- CGI and animation

#### Facial identification of the living

- Age progression
- Eyewitness composites
- DNA-to-face
- Facial recognition
- CCTV analysis
- Facial morphing and deep fakes

If you would like to present a short paper or poster at this symposium, please submit an abstract with your name and affiliation to [facelab@ljmu.ac.uk](mailto:facelab@ljmu.ac.uk) by 1 July 2021.

Details of how to access the symposium will be sent out at a later date.

Please forward this to any interested parties.
